School Dog Risk Assessment

Introduction:

The value of pet 'therapy' is widely accepted as a powerful aid to stimulation and communication. Studies have shown that the presence of companion animals can improve the well-being of children and lower the rate of anxiety, simply by making the environment happier, more enjoyable and less forbidding. The team at St Joseph's have been considering obtaining a school dog for some time and the decision was made in July 2021 to go ahead with the project. The rationale behind this decision was as follows:

- For the school to have a pet that was able to live as naturally as conditions would allow.
- For the animal to be properly cared for outside of the school day.
- To have a pet that the children could interact with and also be of benefit to the children's social and emotional development.

It is accepted that interacting with animals is not appropriate for all children but for some it has the potential to provide many positive benefits. Any parent who does not want their child to interact with 'Abou' or 'Kooki' is invited to write to Miss Cashier and inform her of their wishes. There are no diseases associated with the dogs as they receive all vaccinations, including rabies and complete regular health checks and necessary treatments, such as flea and worming. Both dogs are insured.

The risk assessment below is a working document and will be checked annually by key staff and the governing body.

			<p>exceed 2kg reducing impact of scratched and bites causing harm.</p> <p>All staff will have been introduced to the dog and expectations of having a school dog. She will attend the vets regularly to ensure she is in good health and that her claws are kept short.</p>	
The dog escapes from the Headteachers office areas of the school.	As Above	1	The dog's crate is big enough for her to be happy and safe during the school day and the children are taught not to tease her.	September 2023
The dog causes allergies	Children or staff have allergic reactions	1	<p>Parents have been asked to inform the school of any known allergies. Parents of children with such allergies were contacted prior to the dogs arrival. A list of any children/staff who should not interact with the dog will kept on the school SIMs system. The children will have the opportunity to interact with the dog and those with allergies will be able to opt out of interaction. Children will be taught to wash their hands after active participation with the dog.</p>	September 2023
Children getting germs from the dog	Children or staff will contract diseases that can be carried by dogs.	1	Should the dog defecate on the school site a member of staff will clear this up immediately and dispose of it in a safe way.	September 2023
